

ONGUARD

Advanced Wood Protection Systems

Problem solved.

Coatings fail. No matter what your experience, whether you're a homeowner or a professional specializing in the protection of wood, you're familiar with this principal. Oil-based sealers never harden and eventually wick out of wood. Acrylic coatings harden, but chip away over time. Drawing on over 60 years of wood protection experience, the wood scientists and coating chemists at WoodAg and Aleva Chemical developed the ONGUARD™ system. We solved the problem with a totally new type of coating that soaks into wood like an oil-based coating and then hardens - doubling or even tripling the life of the coating. You'll see dramatic water beading for a year or more and a bold, lustrous color that will last for nearly a decade. And while all coatings eventually fail, ONGUARD™ significantly outlasts and outperforms everything - and costs about the same or a little less than the other semi-transparent stains and sealers in its category.

Keep back the rising tide.

With applications too numerous to mention - ONGUARD™ is powerful and durable enough for residential and industrial applications while offering the color options and simple application of a mainstream wood stain/sealer. Under normal use conditions, get up to 10 years protection from water and ultraviolet radiation, plus unbeatable inhibition of biological attacks in the cured film.

Residential

- Fences & Decks
- Wood Roofing & Siding
- Docks

Industrial

- Access Mats
- Logs & Timbers
- Pallets & Crates
- Prefinish & Manufacturing

Advanced Wood Protection

The world's only water-based, semitransparent stain & sealer.

Using proprietary coating polymers, ONGUARD™ offers the most advanced wood protection system available against water, UV, and mold/mildew in the cured film. Harnessing the newest coating technology, ONGUARD™ achieves a level of performance never before seen in a low VOC, waterborne semi-transparent stain. ONGUARD™ soaks deeply into the wood's surface to form a stable polymeric matrix with truly unsurpassed durability, water repellency, and resistance to microbial growth. Apply one coat to decks, docks, fences, log homes and other exposed wood or wood composite products for a beautiful finish that lasts for years.

The result of recent advancements in coatings science.

Bringing together decades of experience in wood coatings with recent advancements in polymer science, ONGUARD™ could not have been produced 10 years ago. The polymers were simply not sufficiently sophisticated. ONGUARD™ penetrates the wood like an oil coating, but then, unlike oils, it hardens into a lattice, supporting and strengthening the natural cellulosic fibers to protect from the inside out. Homeowners can feel secure in the knowledge that their investment is protected from the damaging effects of wind, sun, and water. Additionally, powerful additives inhibit the growth of mold, mildew and algae within the cured film. OnGuard protects for years, not months.

- Dependable, lasting protection of all wood surfaces
- The absolute best water repellent on the market
- Inhibits the growth of mold and mildew in the cured film
- One coat coverage

Advanced Primer

Unsurpassed adhesion and film hardness.

ONGUARD™ Prime exhibits next-level adhesion and film-forming thanks entirely to the amazing properties of our modern resins. ONGUARD™ Prime will adhere to even the most troublesome wood surface and creates a durable foundation for top-coats and paints. Additionally, our primer delivers more value by greatly extending the coverage of subsequent coatings.

Proven protective additives.

ONGUARD™ Prime delivers substantial, proven protection against the growth of mold and mildew in the cured film. Our proprietary combination of components enhances protection from rain, wind and sun.

- Superior film-forming technology
- Unsurpassed adhesion to both the substrate and most top-coats
- Extends coverage of subsequent coatings
- Protective additives

Call us about unique applications and custom formulations of the ONGUARD™ family of wood protection products: 888-504-8178

Available in 1 and 5 gallon containers; bulk units also available.
Water-based. Ultra-low VOC. Made in U.S.A.

Restore Family of Cleaners

Targeted surface preparation designed for use with the ONGUARD™ Wood Protection System

Our Restore cleaners were designed with the unique properties of wood substrates in mind - to prepare surfaces for treatment across many different conditions and circumstances. We produce these cleaners to be more concentrated and more effective than other commercially

	Restore Oxalic acid-based cleaner	 Restore XL Heavy duty alkaline cleaner	 Restore MP Multi-purpose cleaner
<p>ONGUARD™ Restore harnesses the unique power of Oxalic Acid to bring old, greyed wood back to life. Our concentrated cleaner soaks in and renews wood from beneath the surface - bringing out the beautiful grain and even some long-forgotten reds and browns. Works on contact and will not damage wood if used as directed.</p> <ul style="list-style-type: none"> • For light-duty cleaning and restoration • Concentrated, dilute with 4 parts water • Results after one treatment • Lawn & garden safe 	<p>ONGUARD™ Restore XL is designed for surfaces where a preexisting coating is still active and has not failed. Highly concentrated and highly alkaline, this cleaner is the most powerful tool in our arsenal for preparing wood surfaces for treatment. For best results, follow up with ONGUARD™ Restore.</p> <ul style="list-style-type: none"> • For the most challenging jobs. • Highly Concentrated. Dilute with up to 12 parts water. • Heavy-duty, alkaline detergent • Lawn & garden safe 	<p>For general cleaning, especially in cases of considerable soil, algae or moss build-up, ONGUARD™ Restore MP is the product of choice. Highly concentrated with moderate alkalinity this cleaner is the multi-tool of our surface preparation products.</p> <ul style="list-style-type: none"> • For medium-duty cleaning and restoration • Concentrated, dilute with 4 parts water • Can be used on a wide variety of surfaces • Lawn & garden safe

The best protection for wood surfaces - ever.

The things that matter most when it comes to producing a wood coating that really works - we've got them all. A hardened film, the ability to penetrate surfaces and long lasting water repellency are just some of the advanced features of the ONGUARD™ system. Our modern resins and targeted additives keep wood strong and attractive for over 10 years without flaking or chipping.

	10 Year Protection	Hardened Film	Penetrates Surface	Ultra-Low VOC	Won't Flake or Chip
